Tim Johnson

We would like to extend an invitation to cattle producers to join us on March 2 for our 38th annual production sale.

The Red Angus breed continues to gain market share as the nation's cowherd continues to rebuild. We certainly are fortunate to have repeat customers that have supported us for the last five decades and our new customers that are trying our program. Our philosophy on raising cattle is "staying consistent" and selecting for a balanced set of traits. We simply focus on females that are feminine, highly maternal, with outstanding feet and leg structure with level udders. We strive to have these qualities along with cattle that are deep sided, long bodied and plenty of muscle wrapped up in a quiet, easy-to-handle animal.

The bulls and yearling heifers were weaned in late September and early October and will be carcass ultrasounded in late February. A supplement sheet will be provided sale day and on our website ([www.pedersonbhr.com](http://www.pedersonbhr.com)) and Facebook page ([www.facebook.com/pedersonbhr/](http://www.facebook.com/pedersonbhr/)) Videos will also be available on our website and our Facebook page.

The heifers have come from the heart of our replacement pen. We have culled anything that we would not use ourselves. Oahe Vet from Mobridge did the pregnancy ultrasound for our bred heifers.

We would like to thank our hired man Tim Johnson for his help through the past year. Tim is a valuable asset to our operation and we couldn't get everything done without him. Logan Pederson (Gary and Sue's grandson) has helped us out during the summer months and he too is an asset in tackling the summer workload.

*The Pederson Broken Heart Ranch crew*

# BROKEN HEART RANCH

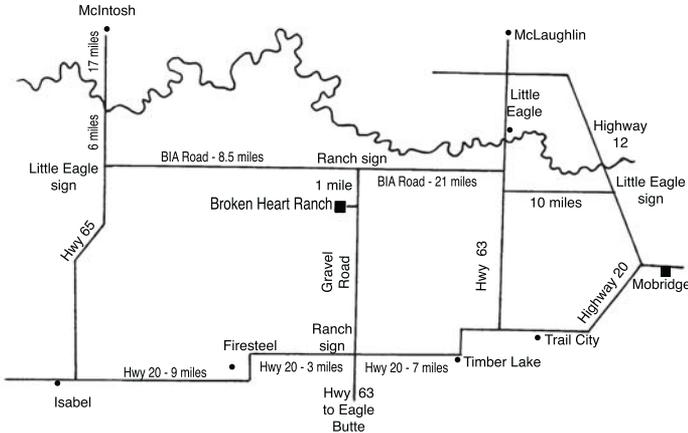

RED ANGUS & QUARTER HORSES

38th Annual Production Sale *Wednesday, March 2, 2016*

1:00 p.m. MST • Storm Date: March 6, 2016

### SALE LOCATION:

At the Ranch – Firesteel, South Dakota  
3 miles east, 11 miles north of Firesteel or 7 miles west and 11 miles north of Timber Lake

### PHONE:

Sale Barn ..... 605-865-3190 or 605-865-3236

### OFFERING:

- 103 Registered Red Angus Yearling Bulls
- 5 Registered Red Angus Bred Heifers
- 5 Registered Red Angus Open Heifers
- 83 Commercial Red Angus Open Heifers

View videos, catalog and more pictures on line at:  
[www.pedersonbhr.com](http://www.pedersonbhr.com)

### SALE ORDER:

A supplement sheet will be provided sale day with carcass, scrotal measurements and sale order.

### SALE HOSTS:

Broken Heart Ranch  
12523 245th Ave. • Firesteel, SD 57633

# Sale Information

## DELIVERY:

It is our policy to assist in delivery to your ranch or to central locations on major highways within 300 miles. Bulls or bred heifers picked up within three or four days will receive a \$50 hauling refund. We will keep the bulls until April 1 at no charge but we will not be responsible for sickness or injury. However, we will keep you informed if anything turns up. We would like to start delivering bulls as soon as weather permits. We're giving a 5% discount on 5 or more bulls to the same ranch and a 10% discount for 10 bulls to the same ranch.

## HEALTH:

All cattle are on a complete vaccination program and are BQA Certified. The bred heifers have been ultrasounded by the Oahe Veterinary Clinic. The open heifers have been Bangs vaccinated and will have had two shots of Fusaguard. Oahe Veterinary Clinic, (605) 845-3634, is our primary veterinarian and will also be available on sale day. None of the cattle have had creep feed.

## COMMERCIAL HEIFERS:

The commercial heifers have been sorted into three groups and will sell in groups of 10 head with the option to take as many as the buyer would like. There is no delivery on the commercial heifers, but we will assist in coordinating trucking as much as possible.

## INSPECTION OF CATTLE:

Cattle will be available for inspection at any time prior to the sale.

## BREEDING GUARANTEE:

We guarantee all bulls to be breeders although we recommend you have the bull's semen tested a couple of weeks before turn out time. If after two tests a bull is found to be a non-breeder, we will replace the bull or allow credit toward next year's sale. This guarantee is void if there is evidence of improper management in caring for the animal, or the bull's inability to breed is due to sickness or injury which was incurred after being sold. The bull shall be returned by the purchaser or other arrangements made with us. Scrotal measurements and ultra sound data on the bulls will be available on sale day. All bulls are born and raised on this ranch.

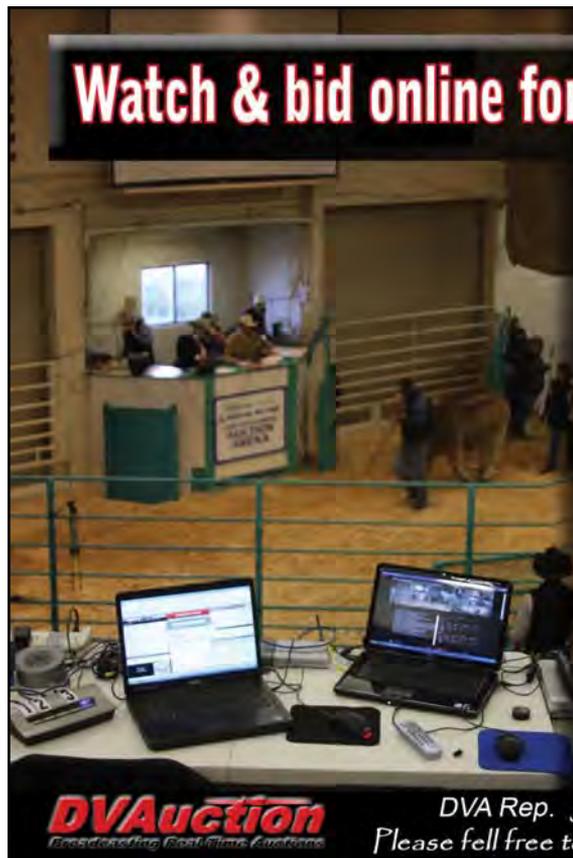

## LIABILITIES:

All persons who attend the sale do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents which may occur.

## SEMEN INTEREST:

Broken Heart Ranch is retaining a 1/3 semen interest in all bulls and selling full possession, full salvage, plus 2/3 semen revenue. This means any semen sold on any of the bulls, Broken Heart will receive 1/3 the selling price per unit. We also reserve the right to collect semen on any of the bulls, for our own use. This semen will be collected at our expense and the buyer's convenience.

We are also retaining the right to one in-herd flush interest in all females to be collected at the seller's expense and the buyer's convenience. Please contact us if you have any questions.

Please feel free to contact me with questions about the sale or to view the cattle for you.

# Bull Selection – Simplified.

Red Angus stakeholders have enjoyed the capability of selecting bulls based on economically relevant traits (ERTs), such as Heifer Pregnancy or Stayability, that truly impact their operations profitability. While these ERTs allow for efficient selection decisions, the growing number of ERTs and EPDs has resulted in confusion as producers attempt to estimate a sire's overall impact. In response, RAAA has developed the HerdBuilder and GridMaster indices, which answer the question:

**“What impact will each potential sire have on my operation’s profitability?”**

## HERDBUILDER

Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions.

The HerdBuilder Index is built using the following scenario:

- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Given that replacement heifers are retained, significant influence is placed on the obvious maternal ERTs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, Yield Grade and growth EPDs also impact the HerdBuilder Index.

## GRIDMASTER

Use the GridMaster Index if your operation's primary goal is maximizing profitability of feeders in the feedyard and on the rail.

The GridMaster Index is built using the following scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

**While the process of calculating an index is very complex, the resulting selection tool is very simple to implement.**

**HerdBuilder and GridMaster are expressed as differences in profitability per exposure.**

**HerdBuilder Example:**

30 cows x 5 years breeding = 150 exposures

Bull A has a HerdBuilder Index of 175:  $175 \times 150 = \$26,250$

Bull B has a HerdBuilder Index of 100:  $100 \times 150 = \$15,000$

**\$11,250 Difference in Profitability**

**Ranch Tested. Rancher Trusted.**

Bieber Thundar's calves are wide topped, and long made cattle. He is siring a very uniform set of calves that certainly will add some pounds and performance to your calf crop. We are very excited to have him in our bull battery and you should see many more calves coming in the future.

7207 is a larger framed bull that is very stylish, smooth made and very complete. This is our second set of calves out of him and we certainly have no complaints. Putting some of these Nebula bulls together for a breeding project certainly will add some uniformity to your program.

7208 is a full brother to 7207 that is a little more moderate but still packs the same growth potential. With an extremely smooth shoulder and a narrow head, he is a calving ease super star. He ranks in the top three percent for CED and Birth weight.

Hard Drive is a larger framed bull that is extremely long bodied with great muscle expression. We purchased him for his length and the fact that his dam was still producing natural calves at age fourteen. Her lifetime average record on fourteen calves is 86 pounds for birth and 682 pounds for weaning. Hard Drive calves are definitely long bodied and wide topped. With the markets paying for pounds, Hard Drive's progeny have the market topping ability.

SSS Drifter is doing a marvelous job as a herd bull for us. He not only offers us some different bloodlines, he is also siring calves that are very eye appealing and packed with performance. We only have one bull calf in the sale this year but we have plenty of daughters that have calves that are top end performers.

Saga is one of the hottest calving ease bulls out there. We purchased a son of him from Ludvigson's and we can see why he is so popular. Saga cattle are moderate birth and really have the ability to grow. There is no Saga semen on the open market so this is an opportunity to have his genetics influence your herd.

- A larger framed Saga son with a wide topline
- His dam is a dark red cow with great feet and some added rib shape.

Achieve it!

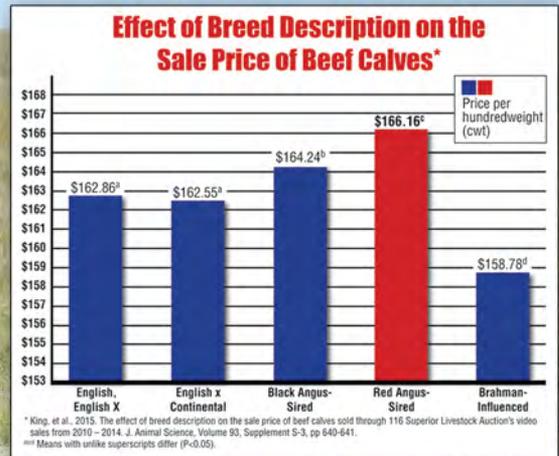

# RETURN ON INVESTMENT

Red Angus genetics will improve your return on investment!

"For 10 to 15 years all the buyers ever talked about was black calves, and the black calves always brought more than everything else. Now I can honestly say that good Red Angus calves outsell the black calves and I know the Red Angus bred heifers will outsell black Angus bred heifers of equal quality every day."

— Jim Davis,  
Superior Livestock Auction

Ranch Tested. Rancher Trusted.

# Red Angus

RedAngus.org  
(940) 387-3502

Independent research shows Red Angus-sired calves sold for a higher price than all other breed groups. Red Angus bulls make a positive difference in your breeding program's bottom line.

## Commercial Red Angus Heifers

We will have our replacement heifers sorted into three groups. We will offer them in groups of 10 and the high bidder will have the option to take a minimum of 10 or as many of the whole offering as they choose in Lot number sequence.

The Green tags will represent Group 1, lot numbers 115 to 159 with an average weight of 760.

Group 2 will be the Orange tags with lot tags from 160 - 185 and will have an average weight of 710.

Group 3 will be the purple tags with lot numbers from 186 - 195 and will have an average weight of 680.

Heifers were weighed on Feb. 1. All the heifers are top cuts from our Registered herd and Commercial herd. We have culled any female that we did not feel would be replacement quality. All of these heifers will sell as commercial. They will be pregnancy tested by Oahe Vet with a breeding soundness exam prior to the sale. A video of these heifers will be available on our website, [www.pedersonbhr.com](http://www.pedersonbhr.com).

## **Beef Quality Assurance Educator of the Year**

*by John Maday, Drovers CattleNetwork*

*Beef producers in North Dakota, and in other states as well, know Lisa Pederson as a tireless and passionate advocate and educator of beef quality assurance (BQA) principles. During the 2016 Cattle Industry Convention in San Diego, California, NCBA and the Beef Checkoff recognized Pederson, who serves as her state's BQA specialist at North Dakota State University, with the 2016 BQA Educator of the Year Award.*

*During the presentation, farm broadcaster Russell Nemetz, who served as emcee for the program, outlined how Pederson has enthusiastically worked with beef and dairy producers across North Dakota to help them improve cattle health and overall management to protect beef quality and optimize productivity.*

*Pederson has also served as one of the founders and a driving force behind the national Bovine Emergency Response Plan (BERP). That plan, developed by specialists at several universities, aims to provide training and education for first responders in communities around the country with a goal of ensuring rapid and appropriate response to emergencies involving cattle, such as trailer wrecks on highways. The BERP training helps responders set a plan for contacting local producers and veterinarians to quickly assist in containing cattle at the accident scene and treating or humanely euthanizing injured animals as needed.*

*Pederson has conducted more than 500 BQA certification and educational meetings for beef, dairy, youth and allied industry audiences in North Dakota over the last 16 years.*

*Pederson grew up on her family's ranch in southwestern Colorado and earned her bachelor's and master's degrees from Colorado State University. She and her husband, Chad, and daughter Bricelyn, are part of the family's registered and commercial Red Angus operation, Broken Heart Ranch, at Firesteel, South Dakota.*
