

MORE THAN A **XVI** BULL & FEMALE SALE

11th Annual Sale

Saturday, March 19, 2016

Selling:

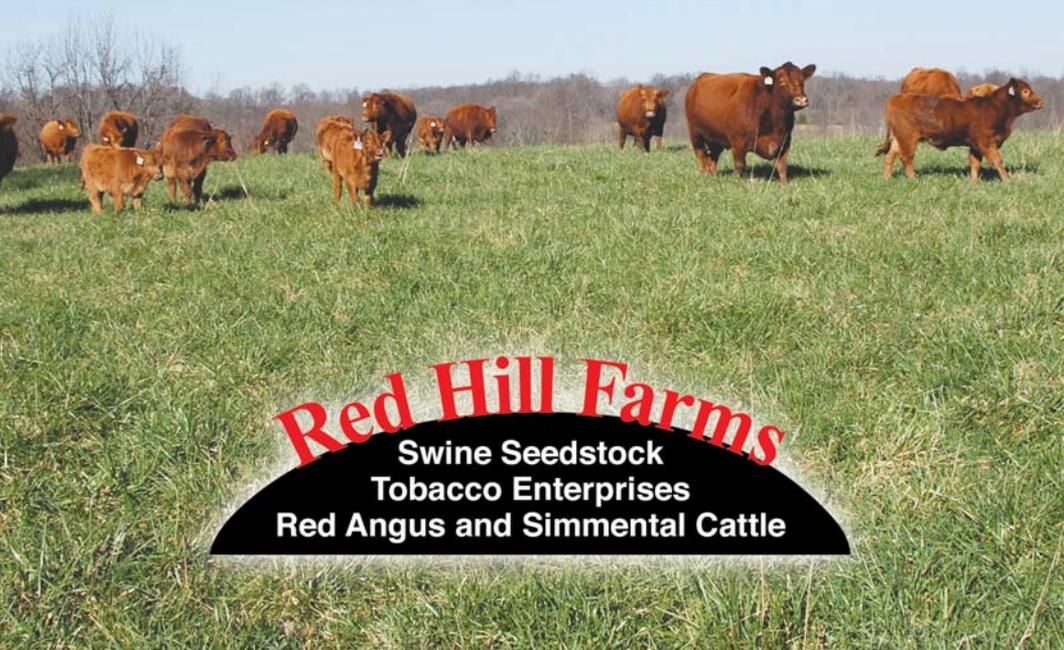

40 Red Angus Bulls

50 Red & Black

Simmental &

SimAngus™ Bulls

30 Red Angus Cows

Red Hill Farms

**Swine Seedstock
Tobacco Enterprises
Red Angus and Simmental Cattle**

Dear Friends,

We are pleased and excited to welcome you to our 11th Annual Bull Sale – More Than a Bull! When we say “More Than a Bull” we want our customers to know that you are buying more than just a bull to breed your cows. You are purchasing part of the Red Hill program – a program that measures success by your profitability. Red Hill cattle have been selected to improve economically relevant traits with a goal of optimizing the practicality and profitability for our commercial customers. We focus on documented breed leading production traits while maintaining phenotypically pleasing cattle. Even so, our program doesn’t stop at the animals we sell. We believe in the importance of offering services to our customers – services that will increase the value of your herd. Ask us about the services we offer!

We have implemented changes for our 2016 sale. The most notable change to the attendees of our sale will be the change of sale location to the ‘home farm’ at the tobacco barns. This will reduce the stress on the cattle and reduce labor for our crew. Additionally, 2016 will be our first sale on DV Auction. At our new location we will have high-speed internet and the ability to stream the sale on the internet. Videos of each lot are available at www.dvauction.com on the Red Hill Farms sale page. If you are unable to attend the sale and would prefer to be on the telephone rather than on the internet, our conference call line is still available. Please register as a buyer prior to sale day if you will not be in attendance.

Saturday is sale day, but we hope you will find time to join us on Friday prior to the sale for our cow herd tours and our evening “Cattle Talk.” The Friday evening program will feature two educational presentations by Dr. Mahdi Saatchi and Dr. Gary Rogers. We believe in the power of education and want to provide our customers the most current and relevant material available!

A major reward of the seedstock business is the opportunity to enjoy the friendship and fellowship of our customers and fellow breeders. You are always welcome to visit our farm to study our cattle and their production records. We intend to collect the most comprehensive data set in the industry – from birth to rail to cowherd records – and share all the information with you, the customer. Please review our catalog and contact us if you have questions. We hope to see you on March 18 and 19!

***Bart, Sarah and Ty Jones
Gordon and Susan Jones***

Welcome to Red Hill Farms
MORE THAN A BULL - 11th Annual Sale

Friday, March 18, 2016

Cow Herd Tours - All Day

Cattle Penned and Available for Viewing after 1 p.m. (CDT)

Red Hill Beef Taco Bar and "Cattle Talk" at 6 p.m. (CDT)

Presenters:

Dr. Mahdi Saatchi, Lead Genomicist, International Genetic Solutions (IGS)

General Information

SALE LOCATION: 2070 Wheeley Springs Road, Lafayette, TN 37083
(NOTE LOCATION CHANGE!!)**

DIRECTIONS:

(CAUTION: FOR BEST RESULTS DO NOT FOLLOW GPS OR INTERNET DIRECTIONS)

FROM LAFAYETTE, TN: North on Hwy 10 – 7.5 miles, turn right on Wheeley Springs Road. Go 2 miles. On right.

FROM SCOTTSVILLE, KY: 100 East, turn right on 1421. Go 4.2 miles, turn left on 1578. Go 4.4 miles, turn right on Hwy 10. Go 1.4 miles. Turn left on Wheeley Springs Road. Go 2 miles. On right.

AIRPORTS: Commercial airline flights to Nashville, TN (60 miles). Contact us if we can assist with transportation.

LODGING INFORMATION: Hearthstone Inn – Lafayette, TN(615) 666-7114
Executive Inn – Scottsville, KY(270) 622-7770
Additional lodging is available approximately one hour from the sale site in Glasgow or Bowling Green, KY, or Lebanon or Gallatin, TN

TERMS: Terms of the sale are cash or good check.

ANNOUNCEMENTS: Sale day announcements take precedence over printed material.

BUYER REGISTRATION: We request all prospective buyers register and receive a buyer number before the sale.

DELIVERY: Free delivery up to 300 miles on all lots. Delivery in excess of 300 miles at cost. For customers in excess of 300 miles, please feel free to call and request a quote for delivery. We coordinate delivery each year and it usually takes 4-6 weeks to deliver all sale animals. A \$100 discount will be given for each lot picked up sale day. If you are not located in Kentucky or Tennessee and are interested in bringing your trailer, please call us to make sure your state will allow transportation on sale day without further health testing.

SIGHT-UNSEEN BIDDING: We will handle all bids confidentially. Contact Bart (615-666-3098) or Gordon (270-991-2663) prior to the sale for information and/or assistance. We guarantee 100% satisfaction on sight-unseen purchases!

RETAINED OWNERSHIP:

Red Hill Farms retains a 1/2 semen interest in all bulls selling.

We are selling 100% possession and 100% salvage or resale value. This gives Red Hill Farms the option to collect, use and market semen from the bull and does not restrict the buyer from doing the same.

VETERINARIAN: Chad Shaw, DVM, Shaw Veterinary Service, (270) 670-7517. Contact Dr. Shaw for any questions regarding Red Hill Farms’ herd health or breeding soundness exams of the sale bulls.

FERTILITY/DISPOSITION GUARANTEE: We guarantee the fertility and disposition of every bull selling. All bulls sell with a breeding soundness exam (BSE) certificate. Each bull is guaranteed to be a satisfactory breeder; assuming the buyer provides acceptable nutrition, health and management.

- If a bull proves to be a non-breeder, the buyer must contact Bart Jones or Sarah Jones on or before January 15, 2017, to make a claim.
- Red Hill Farms reserves the right to request a statement from a veterinarian and/or the bull being returned to Red Hill Farms at the buyer's expense.
- If proper claim is made, the buyer will be given full credit if the bull is returned, OR full credit minus salvage value if the bull was sold with the credit to be used in a future Red Hill Farms sale.

GENOMIC ENHANCED EPDS: Bulls that have genomic enhanced EPDs are designated in the catalog with a logo.

is for the Red Angus bulls and  is for the Simmental, SimAngus and Angus bulls. Most of the bulls selling have been genomically enhanced. DNA markers provide molecular breeding values which are used to enhance the EPDs and improve the accuracy of the EPDs. This is particularly important because the EPDs on these bulls are much more accurate than prior to the use of these DNA values. These enhanced EPDs now have the same meaning as data for bulls that have several progeny records. Dr. Saatchi will discuss the genomic technology and the uses of this technology on Friday evening during our “Cattle Talk.”

SALE PROCEDURES: We will conduct a “Farmers’ Auction” to sell each individual lot. Cattle sell in catalog order. Each animal has a base price listed in the catalog. When it is time to sell a particular animal, we will ask those interested to hold up their buyer number. If only one number is in the air, the animal will be sold at the base price to that individual. If there are multiple numbers in the air, we will gradually raise the price until one number remains. If there is a tie (last two bidders drop out at the same time), the bid is given to the buyer with the lower buyer number. The other bidder may raise the bid by \$250 if he wishes to stay in the auction. We intend for this to be a simple, low-pressure sale for the benefit of all involved.

HEALTH

SPRING YEARLING BULLS

Calves: Spring - UltraChoice 8, Dectomax

July - UltraChoice 8, Bovi-Shield Gold 5, Dectomax

Weaning: UltraChoice 8, Bovi-Shield Gold 5, Dectomax

**** COWHERD TESTED NEGATIVE TO BVD PI & JOHNE’S.**

ULTRASOUND TECHNICIAN: David Aborn, Image Livestock Service

INSURANCE: As an additional service to their customers, Red Hill Farms is offering to pay ½ of the premium for mortality and infertility* insurance on any animal purchased at More than a Bull and Female Sale XI on March 19th! We have partnered with livestock insurance representative, Ben Ballou, of Lafayette, TN to provide the coverage. While we have always guaranteed our bulls, this policy goes above and beyond to cover the risks of disease, accidents and death. Please call Ben at 615-633-2131 or email at ben.idealmarine@wichert.com for more information. He will also be available on sale day to answer any questions.

PREMIUM: 8% of purchase price for full mortality and ASD infertility for bulls Red Hill Farms agrees to pay 4%, buyer agrees to pay 4%. Policy will be in effect for 1 year.

COVERAGE: Full “all risks” of mortality for death from natural causes or humane destruction as a result of a life-threatening injury. The endorsement for Accident, Sickness & Disease (ASD) Infertility provides coverage in the event of permanent impotency, infertility or inability of the bull to naturally service cows as a result of an accident, sickness, or disease sustained during the policy period.

VALUE: The Purchase Price of the bull is considered to be the Agreed Value on the policy. No deductible will apply.

All claims must be immediately reported to the insurance company. All mortality claims made to the Company require a post mortem examination by a Veterinarian. Under the ASD Infertility extension of coverage, the animal’s inability to naturally service cows must be diagnosed by a Veterinarian. The Company may require a second examination to affirm infertility.

This is an abbreviated summation of the actual policy terms and conditions. Please read the entire policy for full coverage details.

*Infertility insurance only available on breeding-age bulls

ALLIED
GENETIC RESOURCES

www.alliedgeneticresources.com

Red Hill Cooperator Breeders

COYOTE HILLS FARM – Coyote Hills is owned by the Dal Clark Family, Scottsville, KY. The Clark family has been in the Red Angus business since 2006. The Coyote Hills cattle are heavily influenced by Buffalo Creek and Red Hill genetics. The addition of these cows has added unique genetics for Red Hill customers. We are fortunate to lease the Coyote Hills farm and manage their cows as a part of the Red Hill herd.

BUFFALO CREEK RED ANGUS – The name Buffalo Creek is forever synonymous with quality Red Angus cattle. After the Buffalo Creek dispersal, Gini Chase asked if we would manage some of her personal cows. We were excited she would send these cows to Red Hill. We enjoy working with Gini, as it is always good to get wisdom from a master breeder. Jack and Gini have been great supporters of our program, and we are honored to have these cows at Red Hill.

SOUTH FORK FARMS / 5 STAR CATTLE – David Billingsley runs a 75-cow herd on 250 acres in Barren County, KY. The 107-acre homestead has been operated by David's family since 1945. David is a charter member of the Barren County Cattlemen's Association, and he is a member of the Barren Beef Group. David's role with the Beef Group has been identifying superior genetics for the group. David has developed an excellent Angus-based cow herd, and it seemed a natural fit for David to become a Red Hill Cooperator to produce SimAngus bulls. This is the third offering of South Fork/5 Star Cattle bulls at Red Hill.

ROGERS CATTLE COMPANY – Rogers Cattle Company, LLC (RCC) started in 2001 as a diversified pasture-based livestock operation and is owned by Johnny and Sharon Rogers. Operating on all leased pasture they produce Red Angus and SimAngus seed stock, commercial cattle, hair sheep, pastured pork and poultry (broilers and turkeys). RCC uses both traditional and local/direct markets to market their livestock. Their herd consists primarily of fall calving Red Angus cows which are mated to Red Angus bulls. There is also a select group of Black Angus and commercial cows. Recently they have A.I. bred some of their cows to Simmental bulls. Johnny and Sharon strive to produce cattle that thrive on intensively grazed fescue based pastures, as well as have great maternal ability, grow well and have excellent carcass merit. Johnny and Sharon work hard to create customer satisfaction while improving the resources under their care.

HARDROCK BEEF CATTLE – Hardrock Beef Cattle was started by Ronnie and Donna Holman on the family farm in the western piedmont of North Carolina. Both Ronnie's father and son are integral participants in the cattle management. Today the herd is comprised of purebred Red Angus cattle as well as red SimAngus and commercial cattle. Hardrock Beef Cattle shares a similar breeding philosophy to Red Hill Farms and have purchased all of their bulls from Red Hill since 2008. Hardrock Beef Cattle operates on a Kentucky 31 based forage system.

zoetis

At Zoetis, we're focused on animal health and wellness for the entire cattle industry. Some of our powerful products and programs include:

- **HD-50K Genetic Testing** – Now for Red and Black Angus.
- **GeneMax Advantage** – For commercial Angus heifer selection.
- **Bovi-Shield™ GOLD®**
- **DRAXXIN®**
- **DECTOMAX®**
- **SelectVAC®** - the U.S. premier vaccination program for beef calves which incorporates the industry's leading vaccines and dewormers to provide flexible, successful pre-conditioning health solutions for our customers' needs.

Zoetis works with livestock producers to enhance the health of cattle, and as partners with producers and meat retailers in ensuring the safety, quality and productivity of the world's food supply.

Take advantage today of the power, safety and efficacy of Zoetis products to boost the **health** and **demand** for your calves.

Questions, call Josh Wackler at 541.740.7475.

Red Angus Guide to EPDs

HB HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GM GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

CED Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

BW Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

WW Weaning Weight and **YW** Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

ME Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

HPG Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

CEM Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

STAY Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

MARB .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

YG Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

CW Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

REA Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

FAT Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

RED HILL FARMS DISCLAIMER – RED ANGUS DATA – POTENTIAL ERRORS

As members of the Red Angus Association of America (RAAA or Association), we rely heavily on the Association to provide services to better explain and document our herd and other herds of Red Angus and Red Angus-influenced cattle. Two of the services that are very important to Red Hill and Red Hill customers are 1) the maintenance of the Red Angus herdbook (i.e. registrations and the associated database that includes pedigrees, genetic defects, genomics, etc.), and 2) genetic evaluations and the resulting EPDs.

Early in the Fall of 2015, the RAAA began a transition to a new database known as RED-SPro. As with many changes and transitions, errors and reporting issues have resulted. There have been errors in registration status, breed percentage, genetic defects, genomic status, and most recently questions about the EPDs as presented. Many of these types of errors have been acknowledged by RAAA staff and programmers; however, many inaccuracies have not been fully resolved.

We have made every effort to ensure that the Red Angus data presented in this sale catalog is the most accurate information available to Red Hill Farms. Nevertheless, there is some information for which the correctness may be out of our control. If you have a question about an inconsistency between our sale catalog and the REDSPro database, please feel free to contact us.

Red Hill Red Angus 18-Month-Old Bulls

The Fall Bulls were weaned in April and May 2015. After a brief dry lot weaning period, the bulls ran on fescue pasture and free choice mineral during the Spring and Summer. Yearling weight, frame score, scrotal circumference, and ultrasound data were taken on 10/12/15. It would have been easy to step up the energy in the diet and add 300 pounds to the yearling weights, but we feel this would have had a negative impact on the bulls' longevity and chose the slower growing forage development. Since that date, the bulls have been on stockpiled fescue and soyhulls (1% of body weight) until mid-January when a high-roughage TMR was added to their diet. Breeding Soundness Exams were performed on February 11, 2016 and the scrotal measurements printed in this catalog are from that date. These bulls have the right condition (fit and trim) and age to service cows immediately.

We are starting the 2016 "More Than a Bull" sale with 3 flush brothers sired by Beckton Nebula P707. These bulls excel in calving ease, HPG, STAY and marbling. This combination indicates these bulls should generate profit. These flush brothers are maternal brothers to the ABS bull, Red Hill B571 Julian 1W, and numerous other sons of 54P working in herds across the country. Lots 2 and 3 were in the breeding pastures with fall cows from 12/11/15 to 2/2/16 and consequently have lower body condition scores than Lot 1.

225B is the result of sampling LSF Takeover 9943W. Takeover is a triple-bred B571 bull that offers different traits for a line-bred Julian. 225B's dam, 49P, is now 12-years of age. She has had 10 calves in a row. We have retained three daughters of 49P at Red Hill – 46S (dam of herdsire 28U), 140Y (an 84S daughter), and 141W (an LT142 daughter selling as Lot 90 and the paternal grandmother of our newest herdsire, Red Hill 190Z Julian 271B.) 49P's 2013-born Nice'n Easy son sold to Dr. Chad Shaw (KY). 49P is a maternal sister to 84S. 225B also ran with cows for our Fall 2015 breeding season.

84S is the bull that put the Red Hill breeding program on the map. B432 has a solid data set and is one of the best 84S sons we have sold. His skeletal design and slick hair set him apart. B432's dam, Y13 is from a top cow family at Johnny and Sharon Rogers. Johnny comments that this cow family exhibits early hair shedding, good feet and extra growth.

B416 is another 84S son that is ideally suited for mating to heifers. Like all 84S cattle, his design, thickness and capacity are superior. His slick hair is a premium for fescue country. B416 is from the same cow family as Lot 5 as their dams are maternal sisters. The dam of B416, X17, is moderate framed, good footed, tight uddered and has small teats. She is feminine with an excellent disposition and gives it all to each calf and continues to breed back each year.

B401 exemplifies the 132Y cattle – thick, heavy muscled, big scrotal measurement and a masculine look. If you like thickness and power check this one out! B401's dam, X93, consistently raises top end calves. She is moderate sized with extra volume making her an easy keeping female. She has small teats on a tight udder and sheds her hair early each year.

B43E's dam, Z47, is one of the rising stars in the Rogers herd. This cow brings a slick hair coat, good udder structure and high performance. This cow family has the ability to thrive on fescue.

Red Hill Red Angus Spring Yearling Bulls

The bulls were developed on a high-roughage haylage based ration with a goal of the bulls gaining 2.25 pounds per day. Yearling weights, ultrasound data, and height measurements were taken on January 18, 2016. Scrotal measurements and BSEs were performed by Dr. Chad Shaw on February 9, 2016, and the scrotal measurements printed are actual measurements from that date. Many of these bulls have grown 1 to 2 centimeters since their January yearling measurements.

81C is a good bull to lead off our Spring Red Angus offering. Neither his sire or dam need an introduction to followers of the Red Hill program. This mating is proven to work. His full brothers sold to Rollins Ranch (FL) in 2014 and Calvo Family Red Angus (NE) in 2015. He also has maternal brothers working for Russ Diedrichsen (NE) and Mike Wood (OK). 81C's dam, 104U, is a favorite cow to many Red Hill visitors. Be sure to check out her video on the Red Angus Foundation Female page on our website!

27C is a moderate, thick B571 son projected for breed-leading calving ease and stayability. B571 has been extremely influential in the Red Hill program. 27C's dam, 40P, has been a model cow for rib, body dimension, moderate mature size, and structural design with a well-balanced udder and perfect teat size. Granted 40P does not possess stellar data, but she worked her way to the donor pen the old-fashioned way – phenotype and production. We have sold numerous sons of 40P. 40P's dam, 287, is also the granddam of 176A. 176A was our top selling bull in 2015 and is one of the most promising young sires in the Red Hill program.

116C is a breeder-quality, black/red carrier. Due to his dam being a Black Angus cow, this bull's ME, HPG, CEM, and STAY are NOT correct. His BW, WW, YW and carcass values should accurately project his value. 116C's maternal granddam is an ANGUS cow that was raised in Missouri on fescue. She has thrived at Red Hill. She is easy fleshing, good uddered, big ribbed, and she has been a great producer.

24C is a direct son of B571. We center our program on the B571 cattle as they excel at the traits we feel are so important – calving ease, moderate mature size, average milk, strong reproduction traits and above average carcass values. 24C's dam, 40P, has been a model cow for years at Red Hill. She was beautifully-uddered, with exceptional phenotype, and calved 10 years in a row before we lost her to toxicity last summer.

39C was our high WWR bull out of the 2-year-old cows. 39C is a thick, muscular, structurally sound bull with a slick hair coat. 39C combines the three cow families that have been solid producers at Red Hill (Barmaid, Vernice and Miniata). His dam and granddam have both calved again in the Spring 2016 season and raise above average calves each year.

7C is a higher-output bull than most Red Angus bulls we sell. This bull brings a little more frame, stoutness and power. He grew and scanned well. For a producer looking to add pounds with above average carcass traits – look no further. 7C's dam, 46R, has calved this spring as an 11-year-old. We have five daughters of 46R in our herd. Sons of 46R are working for Clint Berry (MO) and Johnny Rogers (NC). See the picture of 208X, a maternal brother, at Rogers Cattle Company on our Facebook page.

Red Hill Farms Crew

Red Hill Angus Bulls

The Angus bull management has been identical to that of the Red Angus and Simmental Bulls.

We are presenting American Simmental Association (ASA) EPDs on our Angus bulls for the convenience of our customers for comparing these Angus bulls with our Red Angus and SimAngus bulls. You can directly compare the growth and carcass EPDs across all three breeds (without adjustment) when using these ASA EPDs for the Angus bulls. At the bottom of page 34 we have included the American Angus Association (AAA) registration numbers and EPDs for these Angus bulls. If you are a Kentucky or Tennessee producer with cost-share money available, you must use the AAA EPDs on these Angus bulls for that program.

236B is designed for high output operations. His birth to yearling spread is big; and he excels for carcass traits. Additionally, his data indicated he is ideal for mating to heifers. His dam, 765, is an easy fleshing, slick-haired, big ribbed Angus cow with a beautiful udder. Check out her video on our website (look under Simmental Herdsires for her son, 102A, to see her video). We are keeping a flush brother and three flush sisters to 236B. 236B excels in economic indexes—in Angus he ranks in the top 1% for \$W and in Simmental he ranks at the top of the breed for both API and TI.

10C was a favorite last summer while nursing his dam. The Daylite sired calves are slicker haired with more thickness and muscle shape than other Angus sires used at Red Hill. 10C's dam, 776, is a consistent producer. In addition to her ratios above, her calves have scan ratios of 108 for IMF and 107 for REA.

ASA EPDs and \$ Indexes

CALVING EASE (CE): Percent of unassisted births when used on heifers.

BIRTH WEIGHT (BW): Pounds of birth weight.

WEANING WEIGHT (WW): Pounds of weaning weight.

YEARLING WEIGHT (YW): Pounds of yearling weight.

MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.

MILK (MILK): Pounds of weaning weight due to milk.

MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.

DOCILITY (DOC): Percent of docile calves from one sire compared to calves of other sires.

STAYABILITY (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

YIELD GRADE (YG): Yield grade score.

MARBLING (MRB): Marbling score.

RIBEYE AREA (REA): Square inches of ribeye.

ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details).

TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details).

BACK FAT (BF): Inches of back fat.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

AL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold on a carcass grid basis.

TERMINAL INDEX (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold on a carcass grid basis.

USING API AND TI: First, determine which index to use; if you're keeping replacements, use API. If not, then TI. Just as with EPDs, focus on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring \$140 for API is worth an extra \$6,000 over a \$90 bull if both are exposed to 30 cows over four years ($\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes, visit www.simmental.org.

Red Hill Simmental 18-Month-Old Bulls

The Simmental bull management has been identical to that of the Red Angus bulls – as all the bulls ran in the same pastures and were fed from the same troughs. The Fall Bulls were weaned in April and May 2015. After a brief dry lot weaning period, the bulls ran on fescue pasture and free choice mineral during the Spring and Summer. Yearling weight, frame score, scrotal circumference, and ultrasound data were taken on 10/12/15. It would have been easy to step up the energy in the diet and add 300 pounds to the yearling weights, but we feel this would have had a negative impact on the bulls' longevity and chose the slower growing forage development. Since that date, the bulls were on stockpiled fescue and soyhulls (1% of body weight) until mid-January when a high-roughage TMR was added to their diet. Breeding Soundness Exams were performed on February 11, 2016 and the scrotal measurements printed in this catalog are from that date. These bulls have the right condition (fit and trim) and age to service cows immediately.

Red Hill Spring Simmental Yearling Bulls

The Simmental bull management has been identical to that of the Red Angus bulls – as all the bulls ran in the same pastures and were fed from the same troughs. The bulls were developed on a high-roughage haylage based ration with a goal of the bulls gaining 2.25 pounds per day. Yearling weights, ultrasound data, and height measurements were taken on January 18, 2016. Scrotal measurements and BSEs were performed by Dr. Chad Shaw on February 9, 2016, and the scrotal measurements printed are actual measurements from that date. Many of these bulls have grown 1 to 2 centimeters since their January yearling measurements.

This bull represents many of our SimAngus breeding program goals. We have strived to maintain exceptional growth while adding lots of rib and body in a moderate-framed package. 71C 'fits the bill.' Study his individual ratios! He explodes at each stage of production. His dam and her paternal sisters by 36X are a great group of young cows at Red Hill. We would like to collect semen on this bull after the sale.

42C combines all traits extremely well. 42C offers value to all segments of the beef industry. 42C's dam is an Upgrade daughter with beautiful udder design and teat size. She has calved back this spring as a three-year-old. 42C's maternal granddam, 202, has been a foundation Angus cow at Red Hill. 202 is 14-years-old and raising a calf this winter. 202 has consistently produced calves with well above average scans for %IMF.

125C is a Nightride with a little more growth punch. He posted excellent weaning and yearling ratios. 125C's dam, 145X, is one of our favorite SimAngus cows. She is a 3/4 SM 701T daughter that consistently weans above average calves. Additionally, she has a beautiful profile and a near perfect udder. 125C's maternal granddam produced at Red Hill until she was 12-years-old and was still structurally sound with a good udder.

The only reason we are not keeping 54C or leading the SimAngus sale with him is his disposition. He is nervous in close quarters. After that, he is as good as any bull we have ever sold. He posted fantastic weaning and yearling ratios and did this in a moderate-framed package. He is thick and deep with good feet. 54C's dam, 5A, is arguably our best cow of any color or breed. Her udder, moderate frame size, massive body volume, flawless structural correctness and production record make her very special. She calved early for her second calf in the spring 2016. 5A is on the top of a short list of potential donor prospects. Her dam, 14Y, is another model cow sired by our highly maternal Shear Force son, Hooks Wally 106W.

Thank You!

53C is a red half-blood that ratios well above average at weaning and yearling. 53C's dam, 45S, is a solid producing Red Angus cow. She has a near ideal phenotype and hair coat. This cow family has had excellent longevity in the Red Hill herd. His GGP-LD 50K test results are pending and should be available by sale day.

Do you have British cows? This bull is ideal for mating to Angus, Red Angus or Hereford cows. He will add heterosis to the calf crop, add pounds to the market weight and improve carcass traits. 29C possesses breed-leading index values. 29C's dam, 4W, has built an impressive production record and her calves have consistently scanned above average for %IMF (3/113) and REA (3/110).

Red Hill Farms Red Angus Cows

Each year we receive several inquiries from individuals looking to purchase cows. We have not sold any females in our sale since 2014 and have sold a limited number private treaty. Our herd continues to grow. We are now retaining and calving over 100 heifers each year. We have decided to offer this set of Red Angus cows in our 2016 sale. We have kept many daughters of the cows selling and have sold a number of bulls out of these cows.

The Spring calving cows are selling open with a calf at side. These calves certainly add value to each pair. The calf information is presented along with the lot information.

The Fall cows are selling palpated bred, and Red Hill is retaining their fall 2015 calf. The 2015 calves will be nursing on sale day so each buyer can observe the performance of each cow. If the buyer brings a trailer on sale day, we will wean the calf when we separate for loading. Our intention is to wean this group of cows the week following the sale. We would then deliver the cows after they get over the stress of weaning. The Fall calving cows have their breeding information listed and will be ultrasounded for pregnancy on Tuesday prior to the sale. We will provide the pregnancy information and the sex of the pregnancy on a supplemental sheet prior to the sale.

No better way to start our cow offering than with a Nice'n Easy daughter. This cow exemplifies why Nice'n Easy daughters will make a lasting impact at Red Hill Farms – moderate framed, easy fleshing, sound udders and quiet dispositions. 219X's son sold in last year's sale to Coyote Crossing (VA) and her Brown Premier son is Lot 25 in this year's sale. 219X's dam, P131, is still producing at the age of 12. P131 is a B571 daughter out of Romeo's grandmother.

141W is our only daughter of LT142. Her dam, 49P, is still producing at the age of 12. 141W's maternal grandmother, M554, is our foundation cow that raised our most popular herdsire, 84S. 141W has produced 3 top-end bulls that sold to Lohof (MT), Watson (KY) and Rutt (NE). 141W is one of the highest MPPA cows in the Red Hill herd. We have now retained a grandson, 271B, as a new herd sire.

We have retained 2 daughters of 107S. 107S is a typical Keystone daughter – sound, good-uddered and a regular producer. 107S is calm, but she is very protective of her newborn calf at calving time.

** Red Hill Farms is retaining the Fall 2015 born calves from these cows. Cows will be confirmed pregnant prior to sale.

*** MULTISIRE PASTURE EXPOSURE BULLS - 225B (RAAA #1736618), 221B (1736676) and 231B (1736678)

Sale Terms and Conditions

Except for those stated in the terms and conditions below, there are no warranties, either expressed or implied, as to the merchantability or fitness for a particular purpose with respect to the cattle being sold at this sale. The warranties and guarantess set forth in the "Terms and Conditions" are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy for the Buyer, or any party claiming through the Buyer, for any breach of warranty or guarantee therein provided, and all other obligations or liabilities.

BIDDING:

The Sale Moderator in charge will settle any disputes as to bids, and his decision on such matters shall be final.

TERMS:

Terms of the sale are cash.

PURCHASER'S RISK:

Each animal becomes the risk of the Buyer as soon as sold.

CERTIFICATE OF REGISTRY:

A transferred certificate of registry will be furnished to the Buyer for each registered animal.

HEALTH:

All animals are eligible for interstate shipment, except as otherwise announced. Interstate health papers will be furnished for each animal. Some states require additional health testing prior to shipment which may prevent sale day transport. If you plan to haul purchased bulls home on sale day, please be aware of your state's requirements.

ANNOUNCEMENTS:

Any changes from information of any kind in this catalog will be announced from the auction box and such announcements will take precedence. Breeding Guarantee:

All animals are guaranteed by the Seller to be breeders, with the exception of:

- Animals shown by purchaser after the sale. The breeding guarantees, if any, shall be such as agreed upon between Seller and Buyer.
- Gross neglect or willful misconduct on the part of the Buyer. Bulls are guaranteed breeders if not allowed to run within the herd until at least 14 months of age. Any bull that either, (1) settles one-third or more of the healthy cows he serves, (2) is the sire of 20 or more animals, or (3) settles cows by natural service and passes a fertility test made by a competent veterinarian during any six-month period of trial shall be considered a breeder. Any guarantees with respect to the ability to freeze semen shall be by separate agreement between the Buyer and Seller.

IDENTIFICATION:

Seller offers each animal with readable tattoos corresponding to its registration.

DEFAULT

In the event the Buyer defaults on payment, the Buyer shall be responsible for all costs, including attorney's costs, incurred by Sale Management or Seller in connection with collecting, or attempting to collect, payment due.

GENETIC DEFECT & PARENTAGE GUARANTEE:

For complete rules and regulations in regard to genetic defects or parentage guarantee, contact RAAA or ASA.

Options & Privileges of Return or Adjustment:

- All claims for adjustment or refund must be made in writing by January 15, 2017.
- In the event an animal is claimed to be a non-breeder, the animal may be returned to the farm/ranch of the Seller if in good condition and complying with the health requirements of the Seller's state. The Seller shall be entitled to six months trial following the return of the animal in which to prove the animal is a breeder. If at the end of six months the Seller is unable to prove the animal is a breeder, the Seller, at the option of the Buyer, shall replace the animal with another of equal value or credit in a future sale. The return of the full purchase price shall in any case be deemed full satisfaction and settlement. Any expenses incurred for transporting the animal claimed to be a non-breeder shall be the responsibility of the Buyer. If the Seller proves the animal to be a breeder, it shall be the obligation of the Buyer to take delivery of the animal and pay all expenses incurred for transportation.

SELLER'S SEMEN RIGHTS:

Any semen right retained by the Seller must be announced from the auction box at the time of sale, if not already printed in the catalog.

RETAINED INTEREST:

Red Hill Farms retains 1/2 semen interest in all bulls selling. We are selling 100% possession and 100% salvage or resale value. This gives Red Hill Farms the option to collect, use and market semen from the bull and does not restrict the buyer from doing the same.

RIGHTS AND OBLIGATIONS:

The above terms and conditions of sale shall constitute a contract between the Buyer and Seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction.

PERSONAL INJURY:

All persons who attend the sale do so at their own risk and the Red Hill Farms, its employees, and all other persons connected with the management of the sale, assume no liability, legal or otherwise.
