# WELCOME

Welcome Fellow Cattlemen,  
It is with pleasure that we invite you to our 8th Annual Production Sale.

We would like to thank all our past and future customers for believing in our program and we strive to keep working our best for you. This year's offering is 25 powerful yearling bulls that have been developed on a total mixed ration that consists of grass hay, alfalfa, beet pulp, corn distillers and corn screenings. This is a 48 mega-cal ration that is developed for them to gain 3 lbs. a day.

The demand for Red Angus cattle has never been higher, with Red Angus feeder calves topping the markets across the country and the replacement females outselling the steers. This year we are offering 50 commercial red bred heifers from Cookman farms and 12 open commercial red heifer calves from Bondy farms. This is a great set of replacement females.

We are also selling eight you pick 'em registered heifer calves that are right from the heart of our embryo transplant operation and our cowherd. This set of females is a great opportunity!.

Our operation is based in Grand Forks, N.D., and includes Ryan and Ron Clemetson and our partner, Ed Uriell, from Lakota, N.D. The NCRA prefix is our partner prefix with Ed Uriell. These calves are mostly embryo transplant calves.

If you can't make it to the sale, it will be broadcast live on DVAuction.com. We look forward to seeing our customers and friends, and making new ones. If you have any questions feel free to give us a call!

Sincerely,  
Turtle River Cattle Co.

SALE ORDER/SUPPLEMENT SHEET

A sale order sheet will be available sale day, along with a supplement sheet with scrotal measurements, average daily gain and adjusted yearling weights.

VIEW AND BID ONLINE:

Live bidding will be available online at www.dvauction.com. Please register with DVAuction prior to the sale.

Logan Hoffman .....701 338-2618

Please register early so you are approved as a bidder in plenty of time before the sale. See information on page 2.

## SALE INFO

### INSURANCE:

Bulls that are purchased sale day become the buyers' responsibility as soon as they are sold. We recommend insuring your bulls on sale day if they are staying at the ranch.

### FEEDING AND DELIVERY

Bulls are kept free of charge until April 1. Free delivery is offered in North Dakota or up to 300 miles on bulls (delivery beyond at cost). We will assist in any way possible to get your bull to you. Leave delivery instructions at settlement time. Delivery on heifers is at buyer's cost.

### BREEDING GUARANTEE

All bulls are guaranteed breeders and guaranteed healthy on sale day. All bulls will be semen tested before delivery. Scrotal measurements will be available sale day. Bulls are guaranteed breeders their first breeding season. Pink Eye and Foot Rot shots are available on request at the time they are semen tested.

### TERMS AND CONDITIONS

Cattle will sell according to the terms and conditions suggested by the Red Angus Association of America.

## Red Angus Guide to EPDs

**HB** ..... HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

**GM** ..... GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

**CED** ..... Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

**BW**..... Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

**WW** ..... Weaning Weight and **YW** .... Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

**Milk** .... Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

**ME** ..... Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

**HPG**..... Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

**CEM** .... Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

**STAY**.... Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

**MARB** .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

**YG** ..... Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

**CW**..... Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

**REA** ..... Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

**FAT** ..... Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, favorably increasing Yield Grade.

TRCC Mr. Right 20C is a bull we have been watching! He has been outstanding from every point of view. He might be the most complete bull we have ever raised – he is so thick and deep ribbed with great feet and legs and has that awesome dark red color. We truly believe this bull will have a lasting impact on somebody's herd! He is has very good EPDs. We think he will work on heifer as well! His dam is on pace to be a donor down the road with just two calves that have been standout both years! She has as good of an udder as you put on a female! This is a great herd bull!! Retaining 50% semen interest.

**701-247-2288 – BOB COOKMAN**

*Due to calve from March 20 to April 30. Bred to calving-ease Turtle River Cattle Co. and North County bulls.*

30

## 12 COMMERCIAL OPEN HEIFERS

CONSIGNED BY:

**BONDY FARMS, PETERSBURG, ND**  
**701-270-8007 – JOHN BONDY**  
**701-331-0409 – JAIME BONDY**

*Bondy Farms is offering these Red Angus commercial heifers for sale. They are March/April calves that will make good replacement heifers. They are long with good thickness across their backside and a pleasant disposition. They have been feed 6 lbs. a day of ground corn with a protein supplement and free-choice grass hay. We have used Red Angus bulls for the last 25 years. We have used several bulls from Uriell Red Angus and Turtle River Cattle Co., which have turned out to be high-producing bulls that turn out fine calves.*

## Bull Selection – Simplified.

Red Angus stakeholders have enjoyed the capability of selecting bulls based on economically relevant traits (ERTs), such as Heifer Pregnancy or Stayability, that truly impact their operations profitability. While these ERTs allow for efficient selection decisions, the growing number of ERTs and EPDs has resulted in confusion as producers attempt to estimate a sire's overall impact. In response, RAAA has developed the HerdBuilder and GridMaster indices, which answer the question:

**“What impact will each potential sire have on my operation's profitability?”**

**While the process of calculating an index is very complex, the resulting selection tool is very simple to implement.**

**HerdBuilder and GridMaster are expressed as differences in profitability per exposure.**

## HERDBUILDER

Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions.

The HerdBuilder Index is built using the following scenario:

- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Given that replacement heifers are retained, significant influence is placed on the obvious maternal ERTs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, Yield Grade and growth EPDs also impact the HerdBuilder Index.

## GRIDMASTER

Use the GridMaster Index if your operation's primary goal is maximizing profitability of feeders in the feedyard and on the rail.

The GridMaster Index is built using the following scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.
